

StrykScale Scale Control

StrykScale is a leading liquid scale control specifically formulated for today's extended reach drillout completions operations in the oil & gas industry.

StrykScale applications:

- Coil tubing
- Stick pipe
- Work over rigs
- Open hole drilling

StrykScale has the following features and benefits:

- Prevent the formation of scale from blocking or restricting flow through pipe & pumps
- Prevent scale buildup on drill strings that can be corrosive in nature
- Applicable in fresh water applications and high brines
