

## StrykFR Friction Reducer

**StrykFR** is a leading friction reducer (available, Anionic & Cationic) specifically formulated to help lower pump pressures for today's extended reach drillout completions operations in the oil & gas industry.

StrykFR applications:

- Hydraulic Fracturing
- Coil tubing
- Stick pipe
- Work over rigs

StrykFR has the following features and benefits:

- Lowers pump pressure in water systems ranging from fresh to high brines
- Reduces resistance pumping extended reach laterals
- Improves the removal of plug parts/sand/wellbore debris
- Reduces turbulence & prevents friction losses
