

StrykSweepVB **Viscosity Builder (GEL)**

StrykSweepVB is a premium viscosity builder (available, Anionic & Cationic) specifically formulated for today's extended reach drillout completions operations in the oil & gas industry.

StrykSweepVB applications:

- Coil tubing
- Stick pipe
- Work over rigs

StrykSweepVB has the following features and benefits:

- Designed for sweep applications
- Increases the viscosity of the fluid system for the length of a sweep ensuring any debris in the wellbore are removed
- Applicable in water systems ranging from fresh to high brines
- Reduces pump pressures in extended reach lateral applications where there may be debris from multiple plugs being removed at once
