100% Electric, Fully Automated, Small Footprint, New Technology

Optimize your frac operation with electronically controlled and metered chemical injection.

Chem Shot includes the following features:

- Chemical injection pumps electronically controlled to (+/- 0.1 gpm)
- 100 bbl/min flow rate
- FR injection (0.3 – 4 gpt)
- Additional pumps (0.1 – 1 gpt)
- Intelligent touch screen control panel (on unit and remote field tablet)
 - Automation requires zero onsite personnel
- Wireless tank monitoring
 - Real-time height sensors on all ISOs/Tankers
- Electric power adaptable to any rig or generator source
 - 480V/208V 3 phase or 240V single phase
- Low impact 84" x 108" footprint
 - <1 hour rig up time
- WITS/Modbus compatible
